3. These phone packages do not have a fixed term, meaning that there are no early termination charges if you decide to change package or take your phone service to another provider.
4. About bills: the default option offered to all new customers is monthly e-bills; a monthly paper bill can be requested at a charge of £2 per bill. Monthly bills are issued on a 30-day cycle, plus or minus a few days, but the first bill may take up to six weeks.

8. For calls made to UK mobile numbers, where not inclusive, the charge will be the same no matter where the mobile is located (e.g. abroad) at the time of the call. All other changes will be notified only on our website.
10. Alarm Systems: if you have an alarm that dials out using your telephone line, please note that on rare occasions these alarms may be disrupted if a telephone line is transferred between different suppliers. We are not able to identify which alarms might be disrupted, therefore if your alarm is of a critical nature (e.g. to be used in case of a medical emergency) then we suggest you make alternative arrangements for the transfer date.

SSE Product and Price Guide

for 18 Month Fix and Fibre/
Fix and ADSL

Applicable from 21 August 2019

18 Month Fix and Fibre broadband products

Product name	18 Month Fix and ADSL Broadband	18 Month Fix and Fibre Broadband
Maximum Download Speed	Up to 18Mbps	Up to 38Mbps

Our 18 Month Fix and Fibre and Fix and ADSL packages provide access to the internet from a fixed location. They are only available to domestic customers with an active phone line. The fixed term contract duration for these products is 18 months.

As noted in the terms and conditions applicable to the use of these products, use of the internet needs to conform to our Acceptable Use Policy and Traffic Management Policy which can be found, along with the terms and conditions, on our website at: sse.co.uk/help/phone-and-broadband/regulations-broadband

Each of these products come with an unlimited data usage allowance. There are factors which could affect the speed of data transfer and hence the amount of data that can be downloaded/uploaded on any given day, such as your maximum line speed as well as network capacity. Adverse weather conditions, internal wiring, electrical interferences, network congestion and technical restrictions of your browsing device may all affect the download/upload speed and are beyond our control.

A personalised download speed estimate for broadband at the property is provided before the point of sale, but this estimate remains a guideline as the actual speed will always be affected by the factors highlighted above.

To enable the connection, we provide a pre-configured self-install wireless router that will connect to our network with minimal effort. An engineer appointment at the customer's premises may sometimes be required; if this is the case a quotation for any specific/additional charges would be provided prior to arranging the appointment. Our 'Guide to Engineering Works and Equipment' can be found at sse.co.uk/help/phone-and-broadband/regulations-broadband and provides useful information on possible additional charges.

Prices

To be eligible for these broadband packages at the discounted price of £13, you need to have an eligible energy tariff and an eligible phone package with SSE.

When you have an SSE phone service along with your broadband, a bundle discount as detailed below, is applied to your package every month. The bundle discount is only present on your bill when you have both this broadband service along with a suitable SSE phone package. If you leave SSE for your phone package, you will lose the bundle discount and be charged the standalone price for your broadband service.

Broadband Product	Standalone price – applicable if you do not have an SSE phone package	Bundle Discount – applicable if you have an SSE phone package	Line Rental Only (FF3)	Standard Package price after discount, including 'Line Rental Only (FF3)'
18 Month Fix and ADSL	£25	£32	£20	£13

Other important information

- Switching from another provider takes around 18 to 20 days for most customers:
 - We'll arrange to switch your broadband service to SSE from your current provider;

However, this does not mean that you have been overcharged or undercharged in any one billing period.
- The standard payment method available to new customers is variable Direct Debit.

Cancellation and Early Termination Charges

The following charges may apply following cancellation of the broadband contract:

If you cancel your broadband order before your service start date, there will be no charge unless you have already received your router and you do not return this to us. When you notify us of your cancellation, we will send you a prepaid postage envelope for the return of the router. Should you not return your router within 30 working days an equipment charge of £54 will be added to your account.

For termination at any point between the broadband service start date and the end of 18th month of the contract there is an early termination charge for every day remaining of the contract, this is 38p per day (on average £11.60 per month) with a maximum charge of £208.80 per contract. These charges are not subject to VAT.

These packages are covered by our 'Happiness Guarantee' promise, which waives termination charges applicable on your contract if you decide to leave due to dissatisfaction with the broadband service provided by SSE. The 'Happiness Guarantee' applies only to the first two months of this fixed term contract. More details can be found on our website, in the broadband regulatory page: <https://sse.co.uk/help/phone-and-broadband/regulations-broadband>

23.21 **Broadband Traffic Management Policy**

To ensure that **our** customers receive optimum performance at all times **our Network Operator** undertakes traffic management.

The principles of this network management policy are:

- to make sure that time-critical applications like Voice over Internet Protocol (VoIP) are always prioritised;
- to protect interactive applications like web-browsing and Virtual Private Network (VPN) from non-time sensitive download traffic;
- to flex the network under demand to cope with normal peaks and troughs from day to day and month to month;
- to flex the network in the event of unusual demands in traffic or disaster situations such as a network failure;
- to provide a 'quality of service' effect, meaning multiple applications running on the same line interact with each other effectively; and use of high demand protocols like Peer-to-Peer (P2P) do not swamp time-sensitive traffic such as online gaming or a VoIP call.

Traffic types are identified in real-time based on a combination of port, source Internet Protocol (IP) address and Deep Packet Inspection (DPI) signature detection. This allows **our Network Operator** at any given time to manage the network capacity and prioritise time sensitive traffic by reducing the throughput of the other less time sensitive protocols.
